

FREQUENTLY ASKED QUESTIONS (FAQs) - BIO DISC

1. What kind of minerals are in the Bio Disc? How many of them?

The glass body of the Bio Disc houses 13 minerals locked into it by high heat fusion techniques are technically engineered. Each mineral grain has its own individual shape and size that when combined with the other minerals, through a catalytic conversion, generates the spinning resonance we call chi energy.

2. How does the energy transfer to the water using the Bio Disc?

The Bio Disc energy spins into the liquid, counter clockwise, or the liquid can be pored over the Bio Disc were it 'picks up' the resonance. The resonance generated is similar to that which is found in the earth surrounding many healing spring waters of the world. At the moment scientists can't understand why liquids behave differently and positively in the energy field. Much research is now focused on this fact as 70% of our bodies are made from water and it's important to nourish the body with the correct molecular structured water.

3. Is there any expiry date?

We expect the Bio Disc energy to last 15 years as recent tests on the original pre production test units made five years ago show that they have increased in energy levels. Unlike a magnet the resonance is not affected by the earth's gravitational pull.

4. What would be the effect after the expiry date?

When the disc fails, it will not have the ability to change the taste of any fruit or liquid. Please see answer nine to test your discs energy power.

5. What are the proofs that the bio discs actually turn the water into liquid energy?

There are a number of ways to test the energy level is positive, present and effective.

A) Using any energy life force measurement machine. The better ones are commercially used such as Prognos and Medec.

B) A simple way is to use the taste buds, visual and other sensitive body sensors as follows:

- i) Slice a lemon and lime
- ii) Pour two glasses of liquor or wine out
- iii) Place the lemon and lime on the glass disc along with the glass of wine of liquor.
- iv) Stand the duplicate items 5 meters away from the glass disc
- v) Allow 20 mins. to elapse
- vi) Visual check - the cell structure of the fruit. The slices on the disc will look fresher and younger.
- vii) Smell the liquor or wine – The one on the glass disc will smell softer and sweeter.
- viii) Now taste the samples- from the disc first as they are fresher, have less acid and are sweeter than the original samples you placed five meters away from the disc.

6. How do you know that it is actually changing into liquid energy?

Do the same tests using the 'energy water' you have made over night by standing the water on the Disc. Now pour four glasses of water out and stand the sliced lemon orange or lime as well as the liquor in the centre of the four glasses. Allow 20 mins. To elapse and conduct the same tests as above in question nine.

7. Do you have any International organization approve or recognize your bio technology on the bio discs such as FDA?

The Bio Disc is based on the facts and theories of Quantum Physics. There are no known test and approval bodies to date as the science is so far advanced of modern day technology. "What we can say is that it does not contain radio active element that is harmful to human body and it contains potassium which is used in the functioning of the nervous system, heart and the brain. All the tests carried out so far using Prognos and Medec machines prove that the wellness of the body is improved simply by drinking water stood on the disc. In Traditional Chinese Medicines' the disc has also proven to be worthy as a wellness tool as it balances the chakras, unblocks the meridians and brings Ying and Yang into line..

8. Do you have any lab test results prove that the bio discs works?

Lots of those using the medec and Prognos machines.

9. How far can the energy transfer?

The energy field is measurable 70 m vertically up and down and 20 m in circumference.

10. What is the area cover?

However the effective field of change is 5 m sq.

11. Can I use it to improve sleep? How should I do it?

Sleep disruption is caused by many things; one such effect of poor or restless sleep is caused by ESmog. These impulses are not dissimilar to cell phone frequencies; in this case they are generated from electrical cables hidden in walls and ceilings. By placing the disc in the centre of the bed (on the floor mid way between head and feet) the gentle frequency of the disc dispels the E-Smog effect on the body.

12. Can I use it to heal my knee pain AND GOUT? How should I do it?

Pain again is caused by many things. Inflammation can be a cause of pain. By drinking the energized water this will detoxify the body and can reduce swelling and pain. Holding the disc to the sun causes refraction of the suns far rays. These in turn have been known to heal pain. Simply places the disc in a position were the suns rays refract through the disc (showing the exact logo on the body). There is no need to remove any article of clothing or even a shoe as the far rays will penetrate all surfaces. Turn the disc anti clockwise while refracting the suns rays. Continue this action for fifteen mins. If the pain has not subsided seek medical advice.

13. How does it use to lock the chlorinated water?

While chlorine is a wonderful bio-side it has also been shown to destroy life. Fish and plants cannot live with it and it has been banned from German drinking water for several years. If your supply of water contains chlorine then one can simply stand a bottle of chlorinated water on the disc over night. The new molecular structure of the water will remove the smell taste

and odour of chlorine. Yet the chlorine is still effective but in this case the fish can live and plants will grow.

14. How does it increase the oxygen in the water?

There is no significant testable increase in the dissolved oxygen levels of the water. However, the new molecular structure 'locks in' the oxygen molecules at a cellular level. That is to say – "When one drinks the water" the body's cells can easily absorb the oxygen within the liquid. This is easily detected by a blood test sample or a Prognos machine. Unlike manufactured oxygen water where most of the oxygen is dissolved by the stomach acids.

15. How does it change the tastes of food and drinks in the refrigerator?

This is because the body's own molecular structure (DNA) can 'link' with the liquids biotechnology molecular structure via the taste bud sensors. Instead of having to taste every part of the liquid the taste buds only taste 'select what they like'.

16. How does it prevent Jetlag?

Wetter liquids – more ability for the body organs to absorb water, increased 'hydration' Locked within the natural molecular structure are thousands of molecular clusters. The body organs can hydrate and absorb the liquid more easily. In addition the surface tension of the water has been removed (bio film) which adds to the hydration effect.

Increased Oxygen potential – Increasing oxygen in the blood cells increases energy levels The natural molecular structure locks in the oxygen and other gases within the liquid into quantum suspension. These gases cannot evaporate, as they are part of the liquid. This in turn allows the body's DNA to absorb oxygen at much higher levels than can be found in other liquids.

17. What other benefits beside those above?

Increased perceivable energy levels are obtained simply by standing under the disc while showering. The body can absorb the energy water through the skin. Head to toe effects. One feels positive and energetic most of the day after showering under the disc. Rub a cigarette on the Bio Disc to experience a smoother tasting less throat burning sensation.

18. What is the difference between your bio disc and Ozone Water Treatment System, Diamond Water Treatment System and Oxygenated Water?

The systems mentioned are in the main filtration systems which sanitize and sterilize water, the Bio Disc does neither. It simply adds a positive energy into the chosen drinking water. It can make as much or as little as required. The Bio Disc also positively affects food and fruit.
